

Product Composition:

- ① Final finish with standard or high gloss varnish.
- ② H2P with standard design or customized design.
- ③ Layer suitable to the board panel and effect required (real wood veneer, foil or primed).
- ④ Board type adequate to intended use (MDF, MDF Moisture Resistant, MDF Fire Retardant, chipboard or plywood), others upon request.
- ⑤ Backing suitable to the base board, to guarantee stability (in alternative it is possible to have the same design and finish double sided).

April 2017
